

Meteor®

Top Mount Sand Filters

By Pentair Pool Products®

No chance for escape

Dirt can't sneak through a Meteor® filter. Our unique flow pattern design makes sure all water passes through the optimum amount of sand at the proper speed. It creates an impenetrable maze that traps more dirt to leave your water crystal clear. Plus, because dirt is trapped more uniformly within the sand bed, it requires infrequent backwashing. That means superior performance with less attention from you.

The Meteor strips away particles as small as 20 microns. That's 50 times smaller than an average grain of sand!

Features include:

- High-volume water circulation rates assure your pump works less to filter more for enhanced energy efficiency and lower operating cost.
- Top-mounted, six-way valve means all service and maintenance routines are completed with a flip of the wrist—the integrated pressure gauge, manual air relief valve, and sight glass make operation fast, easy, and safe.
- Slotted laterals prevent sand from entering your pool. Dirt can't sneak in. Sand won't sneak out.
- One-piece, ultra-strong spherical tank features uniform wall thickness to provide years of service. Can't corrode. Won't lose strength.

Meteor[®] Top Mount Sand Filters

Easy-to-read pressure gauge for easy monitoring

Six-position valve provides easy operation of all filter functions

Durable blow-molded tank offers commercial strength and life

Model Number	Filter Area Sq. Ft.	Vertical Clearance*	Filter Diameter	Required Sand [†] (lbs.)	Flow Rate GPM**	Turnover Capacity (Gallons)		
						8hrs.	10hrs.	12hrs.
58931800	1.8	45"	18.5"	65	37.5	18,000	22,500	27,000
58931900	2.1	45"	20.5"	100	45	21,600	27,000	32,400
58930000	2.5	45"	22.5"	150	50	24,000	30,000	36,000

*Required clearance to remove filter elements
 **Flow rates based on NSF 20 GPM per sq. ft. of filter area. Actual system flow will depend on plumbing size and other system components
[†]Use standard #20 silica sand

Simpler and stronger is always better

The best pool filters work tirelessly with minimal attention. That's why the Meteor[®] filter is among the best. It's designed with a six-station, top-mounted valve you simply reposition with a quick turn to operate all functions. And, thanks to its high dirt-trapping capacity, you won't even turn the valve very often. Other quality and convenience features include:

- 1½-inch pressurized sand drain for fast, easy servicing.
- One-piece spherical tank design—same as our commercial grade filters.
- Handy sand funnel included.
- Injection-molded platform base is strong and won't corrode.
- One-year limited warranty. See warranty for details.
